Volcano: Super X is a competitive, fast-paced racquetball game. In this quick-paced game, players are presented with an on-screen monitor that can show graphics and animations of the racquetball court, players, and the ball to help inform the players of their actions. Players will attempt to block and return an object that rolls around the racquetball court toward the opponent and may include a simulated opponent and balls. In “Ball” mode, players may play a game against the computer or a friend. In “Single” mode, players may play one-on-one or in a two-on-one match with up to three players (versus the computer) or one player with two partners (versus a second player). Volcano: Super X also offers a “King of the Court”, or “Co-op” mode, in which two players may play a single game in a team situation. Volcano: Super X contains no death-matches, instead relying on its break-out gameplay. References External links Category:2008 video games Category:Racquetball video games
