About This Game

Summary

Save the Ninja Clan is a platformer for casual players as well as speed runners. There are two ways to play this game: play through the normal story mode or find secrets/"bugs" in the game to annoy the Game Manager watching.

Story

An evil ninja kidnapped your friends. You must collect scrolls in order to find your friends and save them. You will play as different ninjas as the journey progresses. Each ninja has a different ability: Green ninja has a double jump, Purple Ninja has a sprint, and the Grey Ninja has a dash (with temporary invincibility).

Alternate Story

You can annoy the "Game Manager" by finding secrets/"bugs" in the game. Eventually he will get tired of you breaking the current level and send you off to the next one.

-Gamepad/Controller Highly Recommended-

I wouldn't have believed that I'd ever call an RPGMaker game about anime girls as one of my all time favorite games, but here it is. I don't normally even buy RPGMaker games, although after playing this for quite a while I've started paying more attention to them.

Anyway, this is just an incredibly entertaining game. Your hero gets stuck at level 1, so he has to summon girls from other worlds to do the fighting for him. There are quite a lot of these girls and all of them have different skills. Apart from the first girl you can't really know who you'll get, since the summons are random, so you'll have to come up with strategies which work with whoever you have.

The story actually does eventually progress from there, but I don't feel like spoiling it too much. I'll just say that there is much more content in this game than it initially seems. I literally thought about 10 times I had finally beaten the game, and more content just kept appearing... The difficulty also builds up gradually. The game seems to be very easy at first, but it's only because you aren't as far into it as you think. There are also characters who seem to be quite crappy, but whose skills are actually good at some point later on.

So yeah, the fighting is quick and entertaining, there is lots of things to do, the girls are cute, the music is great, the humor is funny, what can I say except highly recommend this game?. lovely game, good artwork and music. Fun puzzles and runs well so worthwhile if you enjoy puzzle and hidden object games. plus its 6 games in 1 its awesome :D. Better than the Java version.. Its turn 38 in the Great Northern War and my PBEM opponent playing Karl XXI, the young king and a genius at war, have been steamrolling his way deep into the polish heartland, pushing away any opposition with ease. Now however he is starting to feel the sting of my scorched earth tactics as he grinds his way towards Ukraine. Crappy roads, russian winter and infrastructure will wither his invincible forces down. It isnt glorious but its the only way I can win this. Loving it! True warfare!. You should only get this in nice bundle with big discount... It's just some new flesh to be shoot.... Maybe the graphic is not high-quality, but I like low-poly game!

The gameplay is much more fun than just watching.

When I kill multiple zombies at once, I feel relieve from stress.

Throw your NPC who disturbs you.

stage 3 was quite hard but I made it!

Wish there's item to kill multiple zombies at once such as bigger flamethrower

If you are good at VR game, try this!

When a corporation faces a delicate problem, how do think it solves it? And what if this problem isn't delicate anymore, but it's green, it slurps and it's eating people? Oh, don't hope for 'good' ending, you know what GIANT SPACE CORPORATIONS are like.

The game is a funny puzzle with black humour. You and your team land on various space objects and try to eliminate an alien threat. Officially. And unofficially you have some other objectives that are not written in your papers. You know what giant space corporations are like.

Good luck, brave and greedy mercenaries! 10V10 keeps.. It's a nightmare, I like it!. it will not downlode eving thow i ave payed fore it. had a few bad reviews but liked 2 so got it , bugs must be fixed as so far i havent run into any everything seems seeable , though i am not skilled at the game and got it only to kill time i am ... disliking the spikey rivers add ill probly pick it up again when i need a migraine , i hate mazes but the game is cool for mindless entertainment up until that point so you get 3 levels to bum round on if you are a talentless / not so patient git like myself.. Great old school crpg experience, quite tough, but really satisfying and rewarding when you make some progress and become more skilled with your party management. I could write a wall of text about this game but there are others who can do that much more eloquently than I. Developers like these guys deserve our support, its obvious that they care about their game and are actively engaged with their community. There are alot of people that will probably just not get what this type of game is all about, but for those that do they are in for a rewarding and addictive experience.

Highly recommended !. Great game that has trading and political interactions. I don't know why, but this game got me hooked right from the start, and I still find it hard to let go.

It's a fun pizza sim game, with great dialogue, characters and overall a good story. The achievements are many, and some of them are extremely hard to get, but it will keep you even more motivated to get the job done. There are SO many possibilities in this game, and it's so god damn addictive!!!!

The only negative thing I can think of is that awfully annoying tutorial, but you have the possibility to skip it every time you get one at least.

So bottom line, do I recommend this? YES!!!!

. That was horrible. I can't stress enough how boring this game was. Even though I was told it was only a half-hour long, I couldn't make it all the way through.

On top of being boring, the graphics are poor.

The worst part was the movement scheme. The camera wobbles around so much that playing for fifteen minutes made both myself and my girlfreind nauseous.

Beware

. I wish I could give this game a neutral review.

I cannot play this game properly, as there is no option to rebind the controls. You have 3 presets and that is it. the one configuration where I can attack, I can't move left.

one character is your typical Timmies first OC. Red on black colors scheme, blind but can still see and is obviously the villan.

There are two characters, and the instant they appeared I knew they were siblings. They are very open about how they're going to rob the place, which is pretty stupid.

The other one, she wants everyone to be happy. That's it. That's her. nothing else.

The player character is also red and black but has some semblence of a personality. She gives little nicknames to common objects and is actually affect by the environment, like a real living creature.

This game can be made actually okay, but in it's current state I can't recomend it. It's still in alpha, so a character redesign or two would be expected before release.

I suggest making the caretaker of the house a sort of butler type, and redesigning the characters to be less of a maxresdefault.jpeg.

The games only \$2.00, so it can't hurt.

Update: after reading the blog posts, I've decided to give the game a positive rating. The development team is involved with their community at a level that actually warms my heart.. This was the most unsatisfying puzzle\escape the room game I\2019ve ever played! Not only was the settings (rooms) super cramped but the puzzles were never more than 1+1= kind of questions. There was never any kind of riddles or elaborate contraptions\questions. The game simply gave you all the answers, so u really never had to think to solve anything. I legitimately believe I could have been blind folded and solved all the puzzles.

Note that I haven\2019t played the last missions as me and my friends was to bored and annoyed to continue.
